The Superintendent shall employ all appropriate means to provide for continuous and candid reports of the results achieved by district staff in the pursuit of those goals and objectives for which reliable qualitative and quantitative measurement indicators have been established. Where reliable measurement indicators are not available, the Superintendent shall describe the alternative basis of assessment. Reports shall include a straightforward statement as to whether goals and objectives have been surpassed, have been accomplished as stated, or remain unmet. The purposes of these reports shall be to allow the Board to exercise its monitoring function and to provide the Board with information needed for making on-going policy and planning decisions.
