

9340 COOPERATION WITH PUBLIC LIBRARY

The public libraries of South Orange and Maplewood play an important role in the intellectual and educational development of children attending district schools, serving them as a resource that reinforces and augments the school library in many areas and providing services and materials that may exceed those that the school library alone can provide.

The Board of Education encourages the effective utilization of the public library by communication and cooperation between the school and public library staffs. School staff members should be kept informed of new materials and services available from the public library, and public library staff members shall be kept advised of school projects and programs that call for pupil use of the public library.
